

TEST REPORT – DEMOBLAZE AUTOMATION TESTING

1. Project Information

Field	Details
Project Name	DemoBlaze Automation Testing
Test Plan ID	TP-DEMO-001
Tester	Jeshma Veera Monteiro
Test Type	Functional & Automation Testing
Tools Used	Selenium WebDriver, Java, TestNG, Maven
Framework	Page Object Model (POM)
Environment	Chrome, Windows 10+
Application URL	https://www.demoblaze.com/
Execution Date	12/09/2026

2. Objective

- Validate core e-commerce functionalities.
 - Verify Signup and Login functionality.
 - Verify product browsing and category functionality.
 - Validate Product Details functionality.
 - Verify Add to Cart functionality.
 - Verify cart product information and cart total calculation.
 - Verify Delete functionality.
 - Validate checkout and purchase functionality.
 - Test negative scenarios and input validation.
 - Identify functional and UI defects.
 - Ensure application stability through automation testing.
-

3. Test Execution Summary

Metric	Count
Total Test Cases	275
Executed Manually	275
Automated	177
Passed	248
Failed/ Defects Identified	27

4. Modules Covered

- Signup
 - Login/ Logout
 - Home Page
 - Product Categories
 - Product Details
 - Cart
 - Checkout / Purchase
 - Contact
 - About Us
 - Pagination
 - Navigation
-

5. EXECUTION SCREENSHOTS

5.1 Signup Execution

=====
===== Navigated to Home Page =====
=====
```

Description:

Phones, Laptops and Monitors categories were selected and products were verified.

Expected:

Products belonging to the selected category should be displayed.

Actual:

Products were displayed under the respective categories.

Status: PASS

5.5 Product Details Execution

Screenshot:

[Insert Product Details screenshot here]

Description:

A product was opened and product information was verified.

Expected:

- Product name should be visible.
- Product price should be visible.
- Product image should be displayed.
- Product description should be displayed.
- Add to Cart button should be available.

Actual:

Product details were displayed successfully.

Status: PASS

5.6 Add to Cart Execution

```
===== TC_CART_002 : ADD PRODUCT TO CART =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Products in cart: 1  
PASS: Product added successfully.
```

Description:

User selects a product and clicks **Add to Cart**.

Expected:

Selected product should be added to the cart.

Actual:

Product was successfully added to the cart.

Status: PASS

5.7 Cart Execution

```
===== TC_CART_003 : VERIFY PRODUCT NAME =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Expected Product: Samsung galaxy s6  
Cart Product: Samsung galaxy s6  
PASS: Product name is correct.
```

```
===== TC_CART_004 : VERIFY PRODUCT PRICE =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Product Price: 360  
PASS: Product price displayed.
```

Description:

Cart functionality was tested by checking the empty cart, adding a product, and verifying cart information.

Expected:

- Empty cart should contain no products.
- Added product should be displayed.
- Product name , price should be visible..
- Cart total should be displayed.

Actual:

Cart product information and price were displayed successfully.

Status: PASS

5.8 Cart Delete Execution

```
===== TC_CART_006 : DELETE PRODUCT =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Products before delete: 1  
First product deleted.  
Products after delete: 0  
PASS: Product deleted successfully.
```

Description:

A product was deleted from the cart.

Expected:

Selected product should be removed from the cart.

Actual:

Product was successfully removed.

Status: PASS

5.9 Cart Total Validation

```
===== TC_CART_005 : VERIFY CART TOTAL =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Cart Total: 360  
PASS: Cart total is displayed correctly.
```

Description:

The cart total was verified after adding a product.

Expected:

Cart total should correctly represent the product price.

Actual:

Cart total was displayed correctly.

Status: PASS

5.10 Empty Cart Checkout – DEFECT

```
===== TC_CART_008 : PURCHASE EMPTY CART =====  
Cart page opened directly.  
Cart is empty.  
Place Order modal opened.  
DEF_CART_001: Place Order is available for empty cart.  
FAIL / DEFECT FOUND  
Order modal closed.
```

Description:

The Place Order option was tested when the cart contained no products.

Expected:

User should not be allowed to proceed to checkout with an empty cart.

Actual:

Place Order option can be accessed even when the cart is empty.

Defect: DEF_CART_001

Severity: Critical

Priority: High

Status: Open

5.11 Checkout / Purchase Execution

```
===== TC_CART_009 : SUCCESSFUL PURCHASE =====  
Home page opened successfully.  
Product selected: Samsung galaxy s6  
Product details page opened.  
Add to cart button clicked.  
Add to cart alert: Product added  
Cart page opened directly.  
Place Order modal opened.  
Order details entered.  
Purchase button clicked.  
Purchase successful.  
Purchase confirmation OK clicked.  
TC_CART_009 completed.
```

Description:

A product was added to the cart and a valid order was submitted.

Expected:

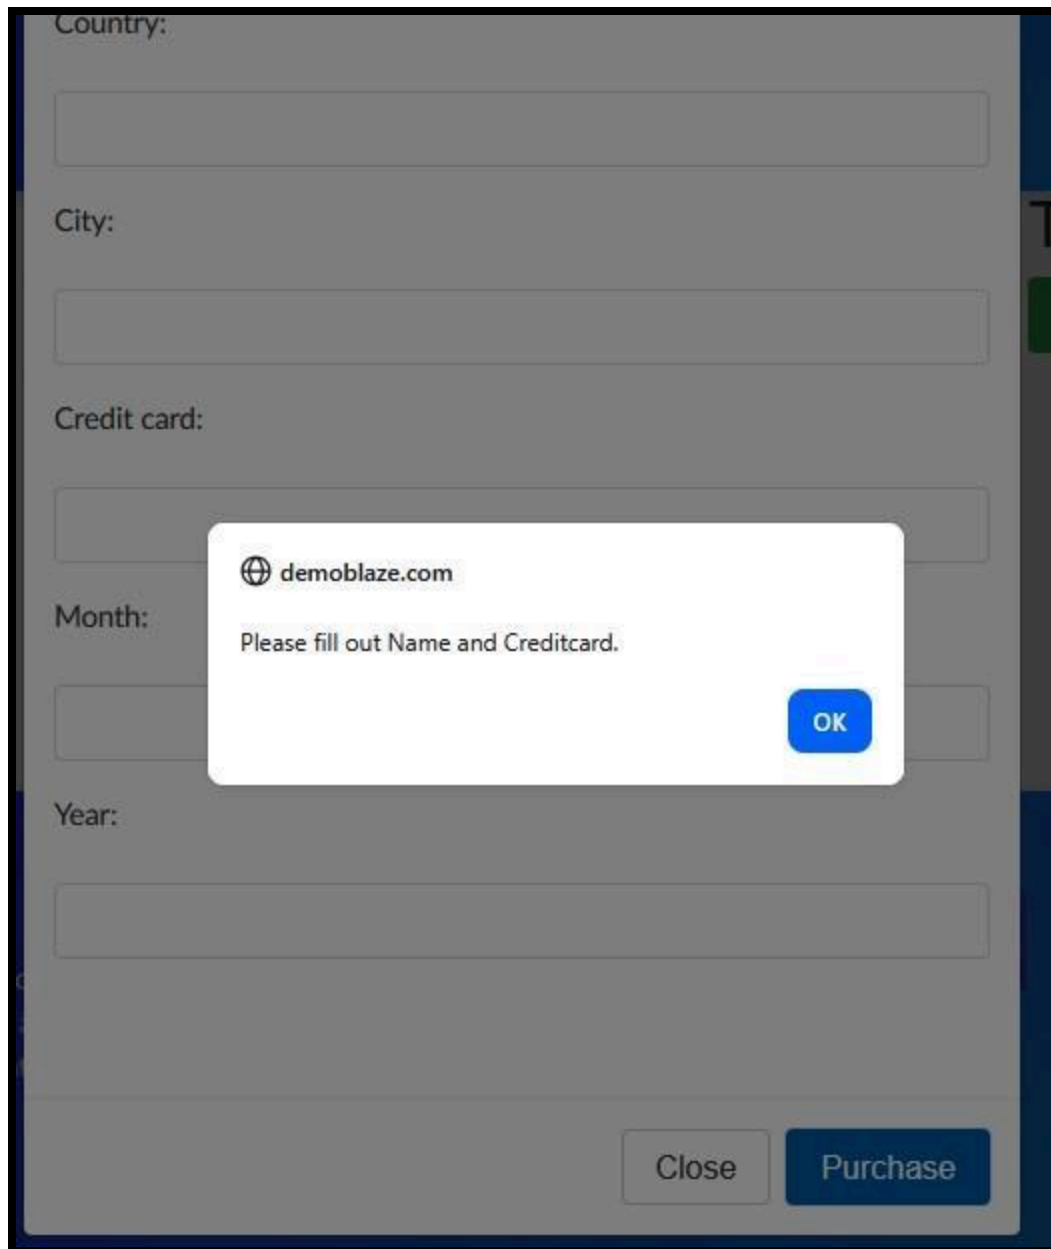

Purchase should be completed successfully after entering valid mandatory information.

Actual:

Purchase was completed successfully.

Status: PASS

5.12 Blank Checkout Fields

Description:

Purchase was attempted without entering mandatory checkout information.

Expected:

System should validate mandatory fields and prevent purchase when required information is blank.

Actual:

Record the actual behavior from your execution here.

Status: PASS / FAIL

5.13 Contact Execution

7. Observations

- Major e-commerce workflows were successfully tested.
 - Product categories and product information were verified.
 - Add to Cart functionality worked correctly.
 - Cart product name and price were verified.
 - Cart deletion functionality worked correctly.
 - Checkout workflow was tested with valid data.
 - Negative checkout scenarios were also tested.
 - An issue was identified where the **Place Order option is accessible with an empty cart**.
 - Input validation should be reviewed for checkout fields.
-

8. Overall Result

- Most tested functionalities worked as expected.
 - Product browsing and category functionality worked correctly.
 - Cart functionality was successfully validated.
 - Checkout functionality was tested using positive and negative scenarios.
 - **High-priority issue identified in the empty-cart checkout flow.**
 - Automation execution was performed using Selenium WebDriver and TestNG.
 - Defects identified during testing were documented separately.
-

9. Conclusion

The DemoBlaze application was tested for its major e-commerce functionalities using functional and automation testing approaches.

The testing covered **Signup, Login, Home Page, Product Categories, Product Details, Cart, Checkout, Contact, and About Us** modules.

Most of the tested functionalities worked as expected. However, an issue was identified in the **Cart/Checkout workflow**, where the user can access the Place Order option even when the cart is empty.

The identified issues should be reviewed and fixed, followed by regression testing to ensure that the changes do not affect previously working functionality.

10. Recommendations

- Prevent checkout when the cart is empty.
 - Strengthen mandatory field validation during checkout.
 - Improve UI feedback and validation messages.
 - Continue regression testing after defect fixes.
 - Maintain stable Selenium locators.
 - Continue using explicit waits for dynamically loaded elements.
 - Maintain screenshots as evidence for failed and important test cases.
-
